

GERMS? | NOT ON MY WATCH.

According to the World Health Organization:

- Thousands of people die everyday from infections acquired while receiving healthcare
- Hands are the main pathways of germ transmission during healthcare
- Hand hygiene is the most important measure to avoid the transmission of harmful germs and to prevent healthcare-associated infections

How to handwash

Wash hands only when visibly soiled. Otherwise, use handrub.

Duration of the entire procedure: 40-60 seconds.

wet hands with water

apply enough soap to cover all hand surfaces.

rub hands palm to palm

right palm over left dorsum with interlaced fingers and vice versa

palm to palm with fingers interlaced

backs of fingers to opposing palms with fingers interlocked

rotational rubbing of left thumb clasped in right palm and vice versa

rotational rubbing, backwards and forwards with clasped fingers of right hand in left palm and vice versa

rinse hands with water

dry thoroughly with a single use towel

use towel to turn off faucet

...and your hands are safe.
